## COCKROACH CONTROL PREP SHEET

### WHAT YOU NEED TO DO FOR THIS TREATMENT

Pick up all items of clothing, toys, food etc., from around perimeter of all rooms, including basement. Remove all items from around and under the vanities in the bathroom(s) and under the kitchen sink. Remove all items from all kitchen cupboards, drawers, and countertop areas. Clean out all closets by removing all items stored on the floors or on shelves, do not be concerned with hanging clothes. Cover or bag all food. When is heavily infested all items need to be cleaned (clothes, dishes, utensils, appliances, electronics)

### BE PREPARED TO VACATE FOR 3 HOURS

You **must** plan on leaving the home for 3 hours. The cockroach treatment consists of treating all rooms of the house with a liquid spray and/or dry powder dust and/or aerosol spray. Chemicals will normally be applied to all baseboards, door frames, door jams, sills, electrical outlets, closets, cupboards, and all other cracks and crevices which are likely to hide cockroaches. It may also be necessary to treat dressers, wardrobes, and other furnishings.

### WHAT YOU SHOULD DO WHEN YOU RETURN

Air out the premises by opening windows and doors before you enter. All counters and surfaces where food and dishes are placed should be wiped down with a damp rag. **Do not** soap down or you will wash away spray. Then you may put everything back in its place.

### FURTHER TREATMENT

You probably will see cockroaches for the first few days. Your help is needed to control and eliminate these pests. Make notes of when and where you see cockroaches after treatment.

\*We do have a \$50 rescheduling fee if prep is NOT complete at time of arrival.
